Approval of the July 24, 2013 Meeting Minutes
Chair Johnson asked for a motion to approve the minutes of the July 24, 2013 meeting. Commissioner Price Johnson moved to approve the minutes, with Mayor McCarthy seconding. The minutes were approved without modification.

Upcoming STP and TAP calls for projects
Doug explained the plans to issue calls for projects for both the STP and TAP programs in late September, and clarified that annual obligation targets are expected to be required for both programs. The board discussed the change to the TAP selection process, which will now be a competitive process involving both Island and Skagit Counties, instead of splitting the available funds 60/40 between the counties and conducting separate selection processes as was done in years prior. Mr. Carlson elaborated on the unique organization of the Skagit / Island RTPO, which effectively operates as two separate RTPO’s most of the time, but has been set up as one RTPO because Island County does not meet the
population threshold to form its own RTPO. The board asked for further clarification as to why this change to the TAP process was needed. Bill also provided an overview of the major milestones of the project selection process.

**Island County STP Projects Update**

Doug talked about three projects of countywide interest. He first provided an update about the status of the Radar Speed Sign installations, outlining the work that has been done to date and the remaining steps needed to get the signs installed. Vice Chair Gordon explained that the costs to the Port of South Whidbey seemed higher than originally expected and asked about the elements of the project that are covered by the grant. Doug agreed to follow-up with more information for Vice Chair Gordon after the meeting.

Doug then explained that the contract for the County's Comprehensive Plan Transportation Element Update has been signed by all parties and that there will be a project kickoff meeting in September with the yet-to-be-formed Project Advisory Committee (PAC). Bill talked about the challenges of managing the work, as the contract is for three separate products: an update to the regional transportation model, an update to the County's Transportation Element, and an update to the Freeland sub-area's Transportation Element. Each product has its own unique geographical area, stakeholders and involvement structures.

The group also discussed the aerial mapping project. Bill elaborated on the data that will be collected and explained how the County verifies the LIDAR topographical information.

**New Items**

There was one STIP amendment for a project within the Island Sub-region. Vice Chair Gordon made a motion to approve the amendment, with Commissioner Emerson seconding.

The meeting ended with Mr. Carlson providing a recap of the August 27th public meeting for WSDOT’s SR-20 Morris Road to Jacobs Road Safety Improvements project
